

METHAKURA

OSCAR THE CAT

1. Equipment you'll need

1. Box cutter or shears
2. Plastic or metal ruler
3. Inkless pen
4. Paper min 200gr/m2
5. Good glue, for example UHU Twist&Glue or PVA glue
6. Surface for cutting – a thick piece of cardboard
7. Clean hands
8. Much patience

2. Printing

If you have a big piece of paper, cut it into A4 format using a sample of suitable size (e.g. a sheet of office paper). But be advised not all printers can handle thick paper. If you haven't found an appropriate printer or if custom printing comes out very expensive, print on casual office paper and put off to thick one. There are several ways to copy, the most time-efficient is to cut details out of the printed list slightly away from the edge, drip 2-3 glue drops into each detail from the clean side of the sheet, attach to thick paper and operate with this "biscuit" in the next stages. After cutting out, you need to carefully remove office paper parts. There'll be traces from glue and paper, but they stay on the seamy side within the model.

3. Joint forming

Use ruler and inkless pen (shiloh, other similar tool, which will not cut through but dish the paper) to force along dashed line and dash-dotted line.

4. Cutting

By dint of shears or ruler with box cutter (for better quality we recommend box cutter) cut out parts by solid line.

5. Preparation

Pay attention to lines inside the parts. Bend the detail according to: a dashed line represents a valley fold (on oneself) and dash-dotted line represents a mountain fold (from oneself).

6. Assembling

There are title numbers on the details. Follow the number order to build the model. Fine numbers on flaps will help not to jumble the gluing process (just find reciprocal part with the same number). Stick flaps to matching parts as they stay on the seamy side (printed side). Continue to glue detail by detail, following number order.
